Article I - GENERAL PROVISIONS

1.01 Purpose

This Agreement creates an entity to exercise the powers shared in common by the Member Agencies to engage in local and regional cooperative planning and coordination and delivery of services. As part of this Organization’s purpose, Member Agencies seek to meet or exceed the current Emergency Response Planning and Management Capabilities within the Operational Area. Further, Member Agencies seek to support existing regional Public Information and Notification Systems, and to continue to support the regional hazardous materials emergency response program. Such purposes are to be accomplished and the Members Agencies’ common powers exercised as set forth in this Agreement.

1.02 Creation of Authority

Pursuant to the Joint Exercise of Powers Act, the Member Agencies hereby create a public entity to be known as the “San Mateo County Operational Area Emergency Services Organization Authority” (“Organization.”) The Organization shall be a public entity separate and apart from the Member Agencies. The geographic jurisdiction of the Organization is all territory within the geographic

boundaries of the Member Agencies; however, the Organization may undertake any action outside those geographic boundaries as is necessary and incidental to accomplishing its purpose.

1.03 Membership in the Organization

Membership in the Organization is limited to public entities, as defined by the Joint Exercise of Powers Act, located or operating within San Mateo County that have approved and executed this Agreement, and contributed resources of any kind toward establishing and supporting the Organization (including, but not limited to financial, personnel, equipment, or other resources) as approved by the Emergency Services Council.

1.04 Participating Members/Partners in the Organization

Participation in the Organization is intended to ensure cooperative emergency planning and response; all participating Member Agencies and partners are expected to attend all regular and special meetings of the Emergency Services Council, encourage active participation by their jurisdictions in the development of plans and training programs, drills, exercises and training opportunities, and otherwise assist in supporting the implementation of this Agreement.

1.05 Powers of the Organization

The Organization may purchase, lease, own and/or dispose of property and equipment and enter into contract(s), as required to satisfy the purposes of this Agreement. The Organization may employ agents and/or employees, operate works and improvements, sue and be sued in its own name, and invest surplus funds.

Article II- COMMON TERMINOLOGY

2.01 Terminology Defined

Not all vocabulary of technical terms listed in the Agreement is used in the Agreement. In part, the terms are included as a resource to further clarify terminology utilized in documentation, field operations and/or applicable subject matter.

2.02 All-Hazards: “Grouping classification encompassing all conditions, environmental or manmade, that have the potential to cause injury, or death; damage to or loss of equipment, infrastructure services, or property; or alternately causing functional degradation to societal, economic or environmental aspects. Annotation: All-hazards preparedness ensures that if a disaster occurs, people are ready to get through it safely, and respond to it effectively. FEMA began development of an Integrated Emergency Management System with an all-hazards approach that included ‘direction, control and warning systems which are common to the full range of emergencies from small isolated events to the ultimate emergency – war.” (DHS, *Lexicon*, October 23, 2007, p. 1)

2.03 Catastrophe: An event during which a society incurs, or is threatened to incur, such losses to persons and/or property that the entire society is affected and extraordinary resources and skills are required, some of which must come from other nations.

2.04 Community Emergency Response Team (CERT): “Community Emergency Response Team” (CERT) training is one way for citizens to prepare for an emergency. CERT training is designed to prepare people to help themselves, their families and their neighbors in the event of a catastrophic disaster. Because emergency services personnel may not be able to help everyone immediately, residents can make a difference by using the training obtained in the CERT course to save lives and protect property. (DHS, *National Response Framework* (Comment Draft). DHS, September 10, 2007, p. 18)

2.05 Command: The act or directing and or controlling by virtue of explicit legal, agency or delegated authority. The term “Command” may also refer to the Incident Commander.

2.06 Emergency: Any incident, whether natural or manmade, that requires responsive action to protect life or property. Under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, an emergency means any occasion or instance for which, in the determination of the President, federal assistance is needed to supplement state and local efforts and capabilities to save lives and to protect property and public health and safety or to lessen or avert the threat of a catastrophe in any part of the United States.

2.07 Emergency Management: A subset of incident management, the coordination and integration of all activities necessary to build, sustain and improve the capability to prepare for, protect against, respond to, recover from or mitigate against threatened or actual natural disasters, acts of terrorism or other manmade disasters.

2.08 Emergency Operations Center (EOC): The physical location at which the coordination of information and resources to support incident management activities normally takes place. An EOC may be a temporary facility or may be located in a more central or permanently established facility, perhaps at a higher level of organization within a jurisdiction.

2.09 Incident: An occurrence or event, natural or manmade, which requires a response to protect life or property. Incidents can, for example, include major disasters, emergencies, terrorist attacks, terrorist threats, civil unrest, wild land and urban fires, floods, hazardous materials spills, nuclear accidents, aircraft accidents, earthquakes, hurricanes, tornadoes, tropical storms, tsunamis, war-related disasters, public health and medical emergencies and other occurrences requiring an emergency response.

2.10 Incident Command System (ICS): A standardized on-scene emergency management construct specifically designed to provide for the adoption of an integrated organizational structure that reflects the complexity and demands of single or multiple incidents, without being hindered by jurisdictional boundaries. It is used for all kinds of emergencies and is applicable to small as well as large and complex incidents.

2.11 Local Emergency: The duly proclaimed existence of conditions of disaster or extreme peril to the safety of persons and/or property within territorial limits of a county, city and county, or city caused by such conditions as fire, flood, storm, epidemic, riot, drought, sudden and severe energy shortage, plant or animal infestation or disease, earthquake, tsunami or other conditions which are likely to be beyond the control of the services, personnel, equipment and facilities of that local political subdivision to combat.

2.12 Local Government: A county, municipality, city, town, township, local public authority, school district, special district, intrastate district, council of governments (regardless of whether the council of governments is incorporated as a nonprofit corporation under state law;) regional or interstate government entity or agency or instrumentality of a local government; an Indian tribe or authorized tribal entity, or in Alaska a Native Village or Alaska Regional Native Corporation; a rural community, unincorporated town or village or other public entity. See Section 2 (10), Homeland Security Act of 2002, P.L. 107–296, 116 Stat. 2135 (2002).

2.13 Mitigation: Activities providing a critical foundation in the effort to reduce the loss of life and/or property from natural and/or human-caused disasters by avoiding or lessening the impact of a disaster and providing value to the public by creating safer communities. Mitigation seeks to fix the cycle of disaster damage, reconstruction, and repeated damage. These activities or actions, in most cases, will have a long-term sustained effect.

2.14 National Incident Management System (NIMS): System that provides a proactive approach guiding government agencies at all levels, the private sector and nongovernmental organizations to work seamlessly to prepare for, prevent, respond to, recover from, and mitigate the effects of incidents, regardless of cause, size, location or complexity, in order to reduce the loss of life or property and harm to the environment.

2.15 National Response Framework: This document establishes a comprehensive, national, all-hazards approach to domestic incident response. It serves as a guide to enable responders at all levels of government and beyond to provide a unified national response to a disaster. It defines the key principles, roles, and structures that organize the way U.S. jurisdictions plan and respond.

2.16 Operational Area: An intermediate level of the state emergency services organization, consisting of the County and all political subdivisions within the county area. In a state of emergency, the operational area shall serve as a link in the system of communications and coordination between the political subdivisions comprising the operational area and the Regional or State Emergency Operations Center.

2.17 Preparedness: Actions that involve a combination of planning, resources, training, exercising and organizing to build, sustain and improve operational capabilities. Preparedness is the process of identifying the personnel, training and equipment needed for a wide range of potential incidents and developing jurisdiction-specific plans for delivering capabilities when needed for an incident.

2.18 Recovery: The development, coordination and execution of service- and site-restoration plans; the reconstitution of government operations and services; individual, private-sector, nongovernmental and public-assistance programs to provide housing and to promote restoration; long-term care and treatment of affected persons; additional measures for social, political, environmental and economic restoration; evaluation of the incident to identify lessons learned; and post-incident reporting and development of initiatives to mitigate the effects of future incidents.

2.19 Resources: Personnel and major items of equipment, supplies and facilities available or potentially available for assignment to incident operations and for which status is maintained. Under the National Incident Management System, resources are described by kind and type and may be used in operational support or supervisory capacities at an incident or at an emergency operations center.

2.20 Response: Immediate actions to save and sustain lives, protect property and the environment, and meet basic human needs. Response also includes the execution of plans and actions to support short-term recovery.

2.21 Standardized Emergency Management System: The Standardized Emergency Management System (SEMS) is the cornerstone of California's emergency response system and the fundamental structure for the response phase of emergency management. SEMS is required by the California Emergency Services Act (ESA) for managing multiagency and multijurisdictional responses to emergencies in California. The system unifies all elements of California's emergency management

community into a single integrated system and standardizes key elements. SEMS incorporates the use of the Incident Command System (ICS), California Disaster and Civil Defense Master Mutual Aid Agreement (MMAA,) the Operational Area (OA) concept and multiagency or inter-agency coordination. State agencies and local governments are required to use SEMS in order to be eligible for any reimbursement of response-related costs under the state's disaster assistance programs.
